

# Report week 2

Project name: Artfolio.

Name and surname: Greta Aquilina.

Week: : 14/03 up to 21/03.

## Functionalities implemented during the week

During the second week, as specified in the timetable, the following has been done:

- Creation of the php files for the sign-up, log-in, post a new Creation, post a new Job Advertisement. Each php file includes: the code of the HTML page and the code of the functionalities required by each page.
- Creation of the php files with the AJAX functions which check, both for creators and companies, that specific fields in the sign-up form are already inserted in the Database.

Approximately, the creation of each php file required 4/5 hours of work.

## Functionalities to be implemented in the next week

During the next week it will be implemented:

- More advanced functionalities such as the suggestion of the users' portfolios when a company creates a job advertisement.
