

# Report week 1

Project name: Artfolio.

Name and surname: Greta Aquilina.

Week: : 7/03 up to 14/03.

## Functionalities implemented in the first week

During the first week, as specified in the timetable, the following has been done:

- The offline environment was set-up, i.e XAMPP, Visual Studio Code.
- The creation of the database (offline) has been implemented through a script which creates the database and its tables.
- The connection file which manages the connection with the database. The connection file will be included in the scripts which require a connection with the database.

Approximately, the creation of the database required 5 hours of work, while the set-up of the environment required 3 hours.

## Functionalities to be implemented in next week

During the next week it will be implemented:

- Creation of php file with the HTML pages: sign-up, log-in, post a new Creation, post a new Job Advertisement.
- Functions which manage the expected functionalities in the HTML pages listed above.
